BUILDING STRONG.

New Cumberland Locks and Dam

New Cumberland Locks and Dam are located on the right descending bank of the Ohio River at the small town of Stratton, Ohio. Across the river and two miles downstream lies New Cumberland, W.Va., the originally planned site of the locks and dam; hence its namesake.

The New Cumberland navigation project was constructed from 1955 to 1961, with the locks opening for traffic in November 1959.

Quick Facts

2012 Commercial Cargo Lockages: 3,694. National Rank: 36.

2012 Tonnage (in thousands): 31,131. National Rank: 22.
